SUMMARY

I am a motivated and detail-oriented MCA student with a strong foundation in software development, programming, and database management. I am proficient in Python, MERN Stack and web technologies, and I have hands-on experience in project development and problem-solving. Eager to apply my technical skills and collaborate in a dynamic team environment to contribute effectively and gain industry experience.

PROJECTS

- Online Therapy and Guidance System** 2026
 - Built a responsive full-stack web application to manage therapy services, featuring secure user authentication, role-based access, appointment scheduling, and an intuitive dashboard. Implemented modern UI design, RESTful APIs, and database integration to ensure scalability, usability, and efficient data handling.
- EduBot** 2025
 - Designed and developed a chatbot platform for college students to exchange items, find nearby PG accommodations, and receive academic support and mentorship. Focused on an intuitive user experience, secure access, and real-time assistance to improve student collaboration and campus life.
- Machine renting and Selling System** 2024
 - Built a web-based platform for renting and selling machines, enabling users to list equipment, browse availability, and manage transactions efficiently. Built using HTML, CSS, Django, and MySQL, with a focus on secure data handling, user-friendly interfaces, and reliable backend operations.
